MAHIMA DHORE

Frontend (React) Developer

Pune, India • +91 7028708249 • mahimadhore0929@gmail.com • linkedin.com/in/mahima-dhore-861933234

SUMMARY

Frontend Developer with **4+ years** of experience building responsive, accessible, high-performance web applications using React.js, JavaScript (ES6+), HTML5, CSS3, and Tailwind CSS. Skilled in component-driven UI development, state management (Redux Toolkit, Context API), and REST/GraphQL API integration, with a track record of shipping measurable performance and reliability improvements across production applications. Experienced with Git-based CI/CD workflows and AI-assisted development tools, partnering closely with cross-functional teams in Agile/Scrum environments.

SKILLS

Frontend: React.js (v19), React Hooks, React Router, JavaScript (ES6+ — async/await, Promises), TypeScript, HTML5, CSS3, Tailwind CSS

State & Data: Redux Toolkit (RTK), Context API, GraphQL (Apollo Client), REST APIs, Firebase, MySQL, Okta (OAuth-based Authentication)

Performance & Quality: Code Splitting, Lazy Loading, Rendering Optimization, Core Web Vitals, Responsive Design, Cross-Browser Compatibility, Accessibility (WCAG)

Testing, CI/CD & Tools: Jest, React Testing Library, Git, CI/CD Pipelines (automated builds & deployments), Vite, Postman, Figma, Node.js, Express.js

AI-Assisted Development: GitHub Copilot, Cursor AI, Claude AI, ChatGPT

Architecture & Practices: Clean Architecture, Component-Driven Design, Separation of Concerns, Modular Code Organization, Code Reviews, Agile/Scrum

PROFESSIONAL EXPERIENCE

Sorted — React JS Developer

04/2025 – Present

Pune, India

- Own end-to-end delivery of frontend features in React.js — from requirement analysis and Figma-based UI alignment through development, testing, and production release.
- Built and maintained a library of reusable React components (Hooks, clean-architecture patterns), reducing code duplication and accelerating delivery of new features.
- Refactored legacy frontend modules into a modular structure with clear separation of concerns, cutting codebase complexity and reducing bug recurrence by **~25%**.
- Implemented route-based code splitting and lazy loading, reducing initial page load time by **~20%** and improving Core Web Vitals across the application.
- Collaborated with cross-functional teams in Agile/Scrum ceremonies (sprint planning, estimation, retrospectives, code reviews).
- Followed Git branching workflows and contributed to CI/CD pipeline configuration, streamlining build and deployment automation for frontend releases.
- Debugged and resolved production issues, handling edge cases to improve application reliability and user experience.

Mindlabz Software Solutions — Jr. Frontend Developer

08/2023 – 04/2025

Pune, India • Freelance / Contract Engagement

- Developed and maintained responsive, user-facing features for Plantify, a plant e-commerce website, using HTML, CSS, JavaScript, and React.
- Delivered Cygnus, a hospital management web application, implementing patient records, appointment scheduling, and reporting modules using React and Redux.

- Designed and consumed REST APIs built with Node.js and Express, connecting frontend interfaces to an SQL database for reliable data flow.
- Created reusable, component-driven UI elements with React and Redux, cutting new-feature development time by **~20%** and improving consistency across projects.

Capgemini — Software Engineer *11/2021 – 08/2023*

Pune, India

- Developed and enhanced frontend components using JSON, JavaScript, HTML5, and CSS3 for an enterprise-scale incident management and spare-parts tracking web application.
- Partnered with QA, backend engineers, and business analysts to identify issues, resolve defects, and optimize application workflows.
- Authored technical design documents (TDDs) and improved delivery efficiency by **~15%** through better sprint processes.

PROJECTS

Outlier-Stats | *React 19, Redux, Context API, React Router, Vite, Apollo Client (GraphQL), Firebase, Okta*

- Engineered a multi-module web application with real-time data updates, season-based views, and dynamic content rendering, using Redux for predictable state management across modules.
- Implemented a GraphQL data layer with Apollo Client and Firebase real-time sync, so data updates reflect instantly across the UI without a page refresh.
- Integrated Okta-based authentication and role-aware access across modules, and improved load performance via lazy loading, route-based code splitting, and Apollo caching to reduce unnecessary re-fetches.

Outlier-Brackets | *React, Tailwind CSS, html2canvas*

- Developed a fully interactive, responsive bracket module with dynamic progression logic, multi-stage selection, and automated mapping between rounds.
- Structured configurable UI states (active, highlighted, disabled) using a data-driven model, making the module easy to maintain and extend across screen sizes.
- Added html2canvas-based export and sharing, letting users save bracket snapshots as shareable images.

EDUCATION

Bachelor of Engineering, Computer Science & Engineering | *2017 – 2021*

Sipna College of Engineering & Technology, Amravati, Maharashtra • CGPA: 8.2

STRENGTHS

- Strong problem-solving skills, including debugging and troubleshooting complex issues
- Approaches challenges with a creative and analytical mindset
- Collaborative team player with a strong teamwork spirit
- Effective communicator with strong client/customer-facing and presentation skills
- Strong willingness to learn new technologies, with an analytical, task-oriented approach

ACHIEVEMENTS

- Shipped a high-traffic interactive feature to production that hit **500+ user entries** on launch day and was architected to scale to **10K+ entries** during peak usage.
