MAHIMA DHORE

React JS Developer

mahimadhore0929@gmail.com | 7028708249 | Pune, India | linkedin.com/in/mahima-dhore-861933234

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience designing and shipping scalable, high-performance web applications using React.js, JavaScript (ES6+), TypeScript, Redux Toolkit, Tailwind CSS, GraphQL, and REST APIs. Skilled at translating complex product and business requirements into clean, reusable, accessible UI solutions, and at optimizing rendering performance and Core Web Vitals in production. Comfortable owning features end-to-end within Agile/Scrum teams and collaborating closely with design, product, QA, and backend engineers to ship reliable, user-facing functionality.

PROFESSIONAL EXPERIENCE

React JS Developer — Sorted **Apr 2025 – Present**

IT Services & IT Consulting Company

Pune, India

- Owned end-to-end delivery of frontend features — from requirement analysis and UI/UX alignment through development, testing, and production release — for a live product used by end users daily.
- Partnered with product, design, and backend teams to translate complex business requirements into stable, user-friendly React.js workflows and pixel-perfect, responsive interfaces.
- Built and maintained reusable, modular React components using clean component architecture patterns, reducing code duplication and speeding up delivery of new features.
- Refactored legacy frontend modules to align with clean architecture principles, reducing codebase complexity and cutting bug recurrence by ~25%.
- Diagnosed and resolved production issues and edge cases, improving overall application reliability and code quality.
- Optimized React component rendering and implemented route-based code splitting and lazy loading, reducing initial page load time by ~20% and improving Core Web Vitals (LCP, TBT) across the application.
- Ensured cross-browser compatibility and responsive design across desktop and mobile breakpoints.
- Actively participated in Agile/Scrum ceremonies — sprint planning, estimation, and retrospectives — driving on-time, reliable feature delivery.

MERN Stack Developer — PathLogics Technologies **Aug 2023 – Apr 2025**

IT System Training & Support

Pune, India

- Completed an in-depth MERN Stack Development training program covering MongoDB, Express.js, React.js, and Node.js, strengthening full-stack fundamentals and modern JavaScript practices.
- Built "Plantify," a plant e-commerce/informational website, as a freelance project — designing responsive React.js UI, product listing pages, and interactive components from scratch.
- Developed a Hospital Management System as a freelance project for Ojas Soft Healthcare Solutions, building modules for patient records, appointments, and staff workflows using the MERN stack.
- Gained hands-on experience with end-to-end feature development, REST API integration, and database design while working independently on client freelance projects.

Software Engineer — Capgemini **Nov 2021 – Aug 2023**

IT Services, Consulting & Technology Solutions Company

Pune, India

- Built and debugged frontend components using HTML5, CSS3, JavaScript (ES6+), and JSP, improving usability and reliability of an enterprise-scale incident management and spare-parts tracking web application.
- Integrated frontend modules with backend REST APIs, implementing proper error handling and loading states while collaborating closely with backend engineers to ensure smooth data flow.

- Collaborated with QA and business analysts across cross-functional teams to identify defects, resolve issues, and optimize application workflows.
- Authored technical design documents (TDDs) and contributed to Agile/Scrum development cycles, improving delivery efficiency by ~15% through better sprint processes.

PROJECTS

Outlier-Stats

React 19 · React Router DOM · Redux · Vite · Apollo Client · GraphQL · Firebase · Okta

- Built a multi-module, scalable web application with real-time data updates, season-based views, and dynamic content rendering.
- Implemented a GraphQL data layer using Apollo Client with Firebase for real-time sync, enabling immediate UI updates without a page refresh.
- Improved application load performance through lazy loading, route-based code splitting, and Apollo caching — reducing unnecessary re-fetches and keeping the UI responsive.

Outlier-Brackets

React · Tailwind CSS · html2canvas

- Built a fully interactive, responsive bracket module with dynamic progression logic, multi-stage selection, and automated mapping between rounds.
- Designed configurable, state-driven UI states (active, highlighted, disabled) from a structured data model, making the component easy to maintain and extend.
- Delivered a visually rich, pixel-perfect responsive layout using gradients, patterns, and state-driven rendering mechanisms.

PAMIR

HTML · CSS · JavaScript · JSP · Java · Struts · Spring Boot · JDBC · MySQL · REST APIs · Postman · SVN · Jira

- Developed responsive UI features for ticket creation, incident handling, multi-criteria search, and reporting workflows in an enterprise-scale system.
- Built both Front Office and Back Office interfaces used daily by support and service teams.
- Integrated REST APIs with backend teams and improved cross-team tracking and reporting workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js (v19), Redux Toolkit (RTK), Context API, Tailwind CSS, Bootstrap, Node.js, Express.js

API & Data: GraphQL, Apollo Client, REST APIs, React Query, Firebase

Testing: Jest, React Testing Library

Database: MySQL

Tools & Platforms: Git, Vite, Postman, WP Engine, Figma, VS Code, Cursor AI, Claude AI

Practices: Component Architecture, Code Splitting, Lazy Loading, Cross-Browser Compatibility, Responsive Design, Performance Optimization (Core Web Vitals, LCP, TBT), Accessibility, Agile/Scrum

EDUCATION

Bachelor of Engineering, Computer Science & Engineering

Sipna College of Engineering & Technology, Amravati, Maharashtra | 2017 – 2021 | CGPA: 8.2

ACHIEVEMENTS

- Shipped a high-traffic interactive feature to production, reaching 500+ user entries at launch and architected to scale to 10K+ entries during peak usage.
- Recognized for delivering reliable, production-ready frontend solutions with a strong focus on scalability, performance, and long-term maintainability.
